# a simple C++ code

```
1 int main() {  
2     // Define variables at the beginning  
3     // of the block, as in C:  
4     CStash intStash, stringStash;  
5     int i;  
6     char* cp;  
7     ifstream in;  
8     string line = "str";  
9 }
```
